The SMART-C® Procedural Footprint

SMART-C® has a wide range of uses within the podiatry environment. To date, podiatrists have used it for:

- **Diagnosing** fractures, dislocations and other foot and ankle conditions
- **Guiding** minimally invasive procedures, such as intra-articular injections and foreign-body removal, in the clinic setting and on the sidelines during sports practices and games
- **Remediating** bunions, hammertoes, heel spurs, arthritic joints and deformities
- **Weight-bearing imaging**, such as stress fluoroscopy to diagnose podiatric conditions or monitor progress after treatment

A SMART-C® Financial Decision

Stop sending patients out for radiology. With SMART-C®, you control imaging and capture associated revenue.

Procedural Powerhouse

Reduce your reliance on the ASC. SMART-C®'s dynamic imaging capabilities help you expand the list of in-office procedures you can offer, including:

- Fluoroscopic guidance for needle placement, \$114*
- Stress fluoroscopy, \$54*

**2024 national Medicare average*

Maximize Your Space

Avoid construction and wasted space for a dedicated radiology room. You can now perform low-dose, high quality fluoroscopic imaging anywhere in your office.

Superior Patient Satisfaction

Performing more imaging and procedures in-office isn't just a financial benefit for you. Enjoy the improved patient interaction and potential for increased treatment acceptance by reviewing images in real time with your patient. Ready access to the SMART-C® provides financial and convenience benefits to your patients as well. With in-office imaging and procedures, the cost to the patient is reduced, and faster access to imaging and treatment results in faster recovery. Happy patients means high approval ratings and increased referrals.
